Cemento Natural Cerámico

Style finds its inspiration in concrete. This collection, part of **Contemporary Mixtures Surfaces**, goes back to the origins of industrial design, **recovering raw concrete** and stressing the result of an open air hardening. The irregular shade surface gives a unique character to the pieces, as it boosts the effect of salts through gloss and matte finishes which create areas full of details and plays of light.

Sizes up to 90x90 cm and its technical features, together with its sober and contemporary colors, make this collection suitable for contract and outdoor projects.
