## Stone Project

Taking its name from the Portuguese and Catalan limestones, Stone Project is a minimalist and refined collection, included in Contemporary Mixtures Surfaces. It shows several finishes; with a semi-matte and even polishing; and, which combines in perfect proportion mattes and subtle glosses in the grains and fossils spots. A unique quality through a careful selection of surfaces launched in 7 timeless stony colors with reduced shade variation.

It is capable of creating sophisticated settings with large format pieces, like 90x90 or 60x180 cm, in which its design quality goes hand in hand with the highest performance. Mechanical properties and durability of natural limestone, suitable for its use as floor covering, are enhanced.
